Innopack

Order Picking Technology
for Non-Returnable
Container Applications

Order Picking – To Pick and Place Items and Packs

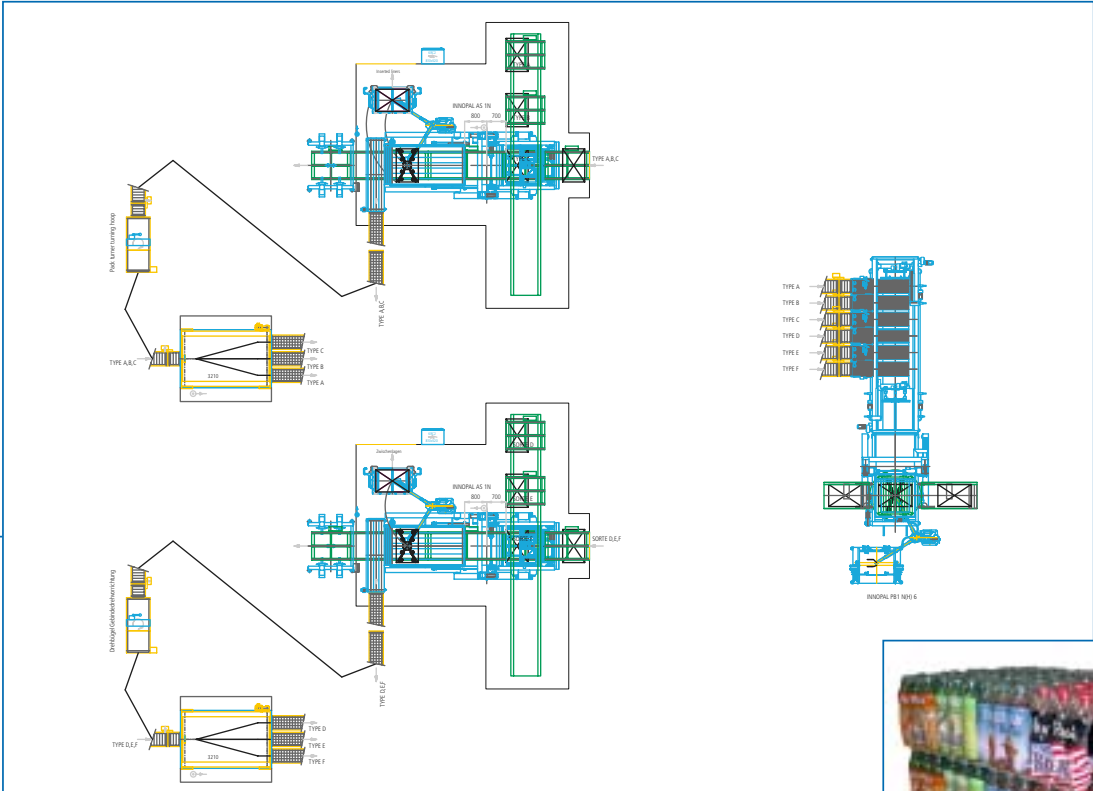

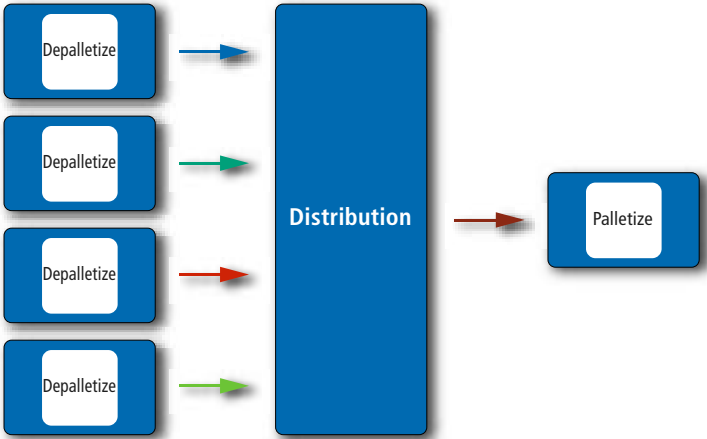

Examples of applications and project planning based on a modularly designed machine structure

Order Picking –

To pick and place identical packs

Output from 1000 to 4000 containers/h

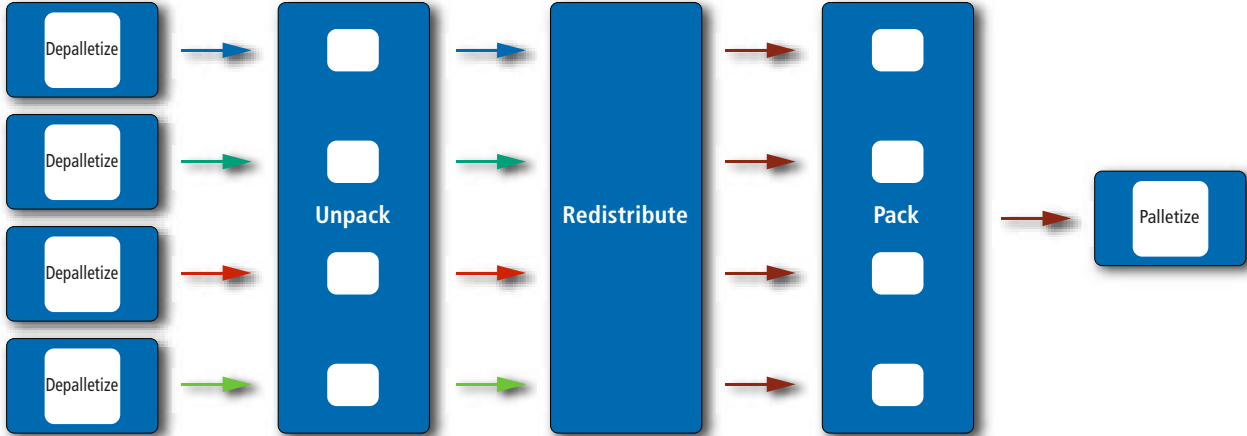

Project planning example

Order Picking –

To pick and place identical items within a minimum amount of space

Output from 1000 to 3000 containers/h

Compact clearly arranged modular design system:
Unpacker, redistributor, packer.
Saves you space.

Unpacking of segregated trays.

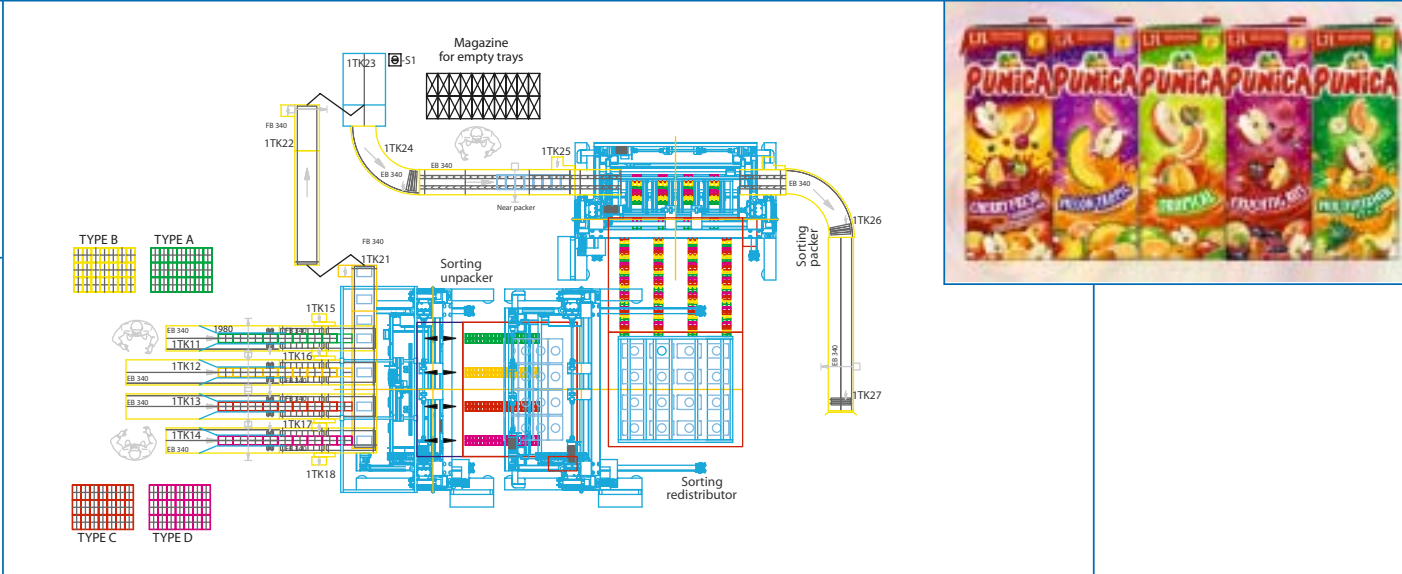

Head rotation for gentle product unpacking.

Reuse of trays.

Mixing by a redistribution station.

Variable degree of mixing for each production batch comprised, for example, of four types.

Project planning example

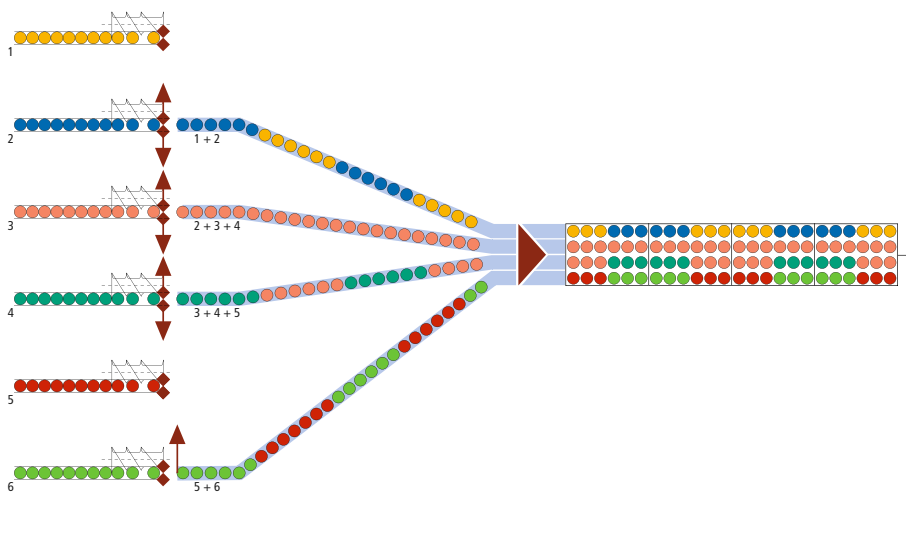

Counting in items by classification.

Output up to 72,000 items per hour.

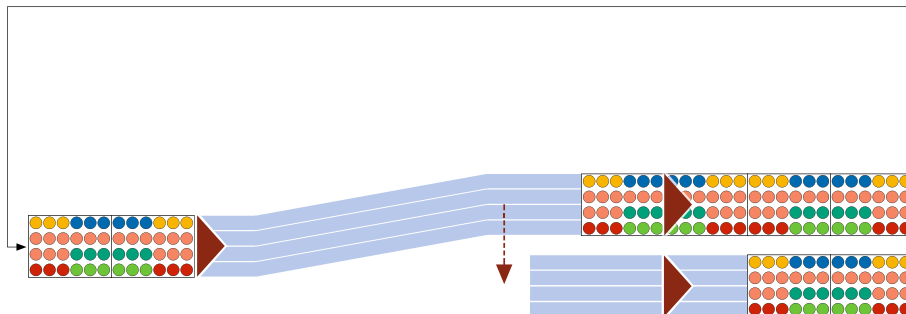

Processing range:

Bottles, jars, cans, plastic and glass containers

Distribution 1

High-performance
order picking distributor

Distribution 2

Item flow distribution
